

Subject:	ITT1-2 (Responsive Webpage Design and Development)
Topics Covered:	Building a Responsive Web Template
Intended Learning Outcome:	<p>At final lab exam, you will able to:</p> <ul style="list-style-type: none"><li>– Discuss the roles of Bootstrap forms, its components and different form layouts.</li><li>– Examine the various form controls or elements and illustrate how to add them in forms.</li><li>– Create input groups and apply the different input sizing techniques.</li><li>– Utilize the different layout components in Bootstrap, discuss their functions and benefits on building and designing web pages</li><li>– Demonstrate how to create layout components by applying their predefined classes to work properly.</li><li>– Design a simple web template involving navigation bar, build a toggleable navbar, and identify its components.</li></ul>

FINAL LAB TERM EXAMINATION DESCRIPTION

Design the web template as shown in the image below using Bootstrap 4. Observe and analyze carefully the different components needed on the web page. **(40 Points)**

The Registration Form Page

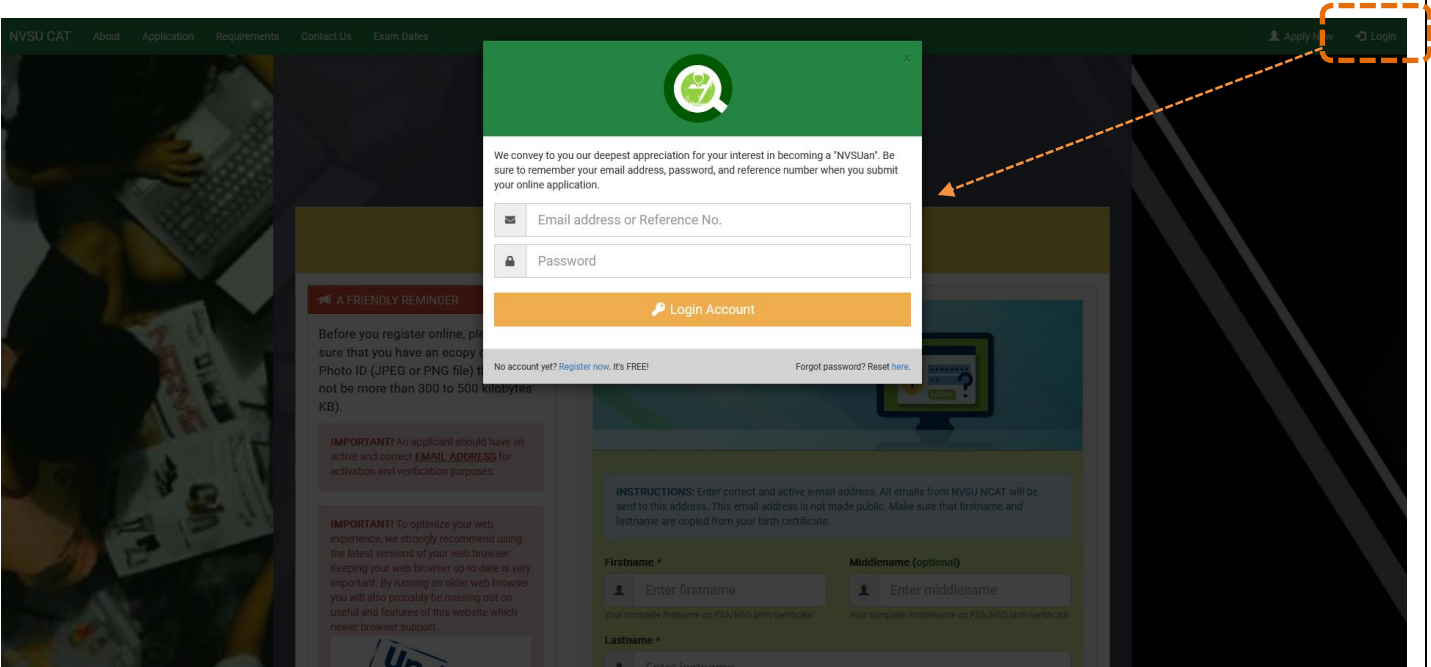

For a better and clearer resolution of the output, you can view or check a sample image here:

The Login Modal Form

The Login link menu at the top rightmost part of the navigation bar will open the login modal. Use the concept of launching a modal from the last module (Module 7) that was uploaded to MS Teams. Again, use the appropriate form elements shown in sample image below.

**NOTE:** You can download all images used in the sample output here:
